Sprint 1 Report: SocialHub 4/28/23

Actions to stop doing:
- **Stop being disorganized** - we didn't have a set schedule for daily standups to check on each other's progress. Most of our tasks were overlapping.

Actions to start doing:
- Our team needs to start our second sprint, we got off on a slow start but now have basically caught up.
- So far our webpage has no real artistic/overall theme and it feels very bland, as a team we need to start taking this into consideration.e
- Start development of landing page - page that will show up before user logs in
- Start development of home page  - page with analytics and various data from API's

Actions to keep doing:
- Keep improving on the login page - improve on design, and add functionality to some buttons.
- Keep being organized - updating the trello page, standup meetings, etc.
- Keep researching API's - in order to expand the functionality, add functionality or remove unnecessary requests (to keep within free tier).

Work completed:
- As a user I would like to be able to log into my account that stores all of my analytics and data. [4]

Work not completed:
- As an influencer, I want to be able to see the statistics of my posts across all platforms, so that I can easily track my performance across multiple platforms. [3]
- As an analyst, I want to gather data in various formats (daily, monthly, etc) to better analyze and optimize the posts. [2]

Work completion rate:
- Completed 2 user story
